Thank you for helping out!

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

The Schwine-Kitzenger Institute study of 47 men over the age of 100 showed
1. that all had these things in common:
2. They all had moderate appetites.
3. They came from middle class homes
All but two of them were dead.

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
