# Kakuro #2

*A city is a large community where people are lonesome together.*
*-- Herbert Prochnow*

*Fakir: A psychologist whose charismatic data have inspired almost religious devotion in his followers, even though the sources seem to have shinnied up a rope and vanished.*

Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.
