Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

*At some point, every family would certainly touch its dean -- if it could only agree on a date.*

*It is better never to have been born. But who among us has such luck? One in a million, perhaps.*
