Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

Q: How many IBM CPU's does it take to do a logical right shift?  
A: 33. I'm hold the bits and 32 to push the register.

One function of diplomacy is to dress realism in morality.
