Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

If you see that there are four possible ways in which a procedure can go wrong, and you circumvent these, then a fifth way, unimagined for you, will promptly develop.

If you take off your right-hand glove in very cold weather, the key will be in your left-hand pocket.
