Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

Fudge Factor: The numerical factor by which experimental results must be multiplied to be in agreement with theory.

He who sees what comes out, and why, gains wisdom.
-- Richard N. Farmer
