Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

Time flies like an arrow; fruit flies like a banana.

He who receives a good turn should never forget it; he who does one should never remember it. -- Channon

The marvels of today's modern technology include the development of a soda can, when discarded will last forever... and a \$7,000 car which when properly cared for will rust out in two or three years.

Familiarity breeds contempt.
