*\$100 invested at 7% interest for 100 years will become \$100,000, at which time it will be worth absolutely nothing. -- Lazarus Long, "Time Enough for Love"*

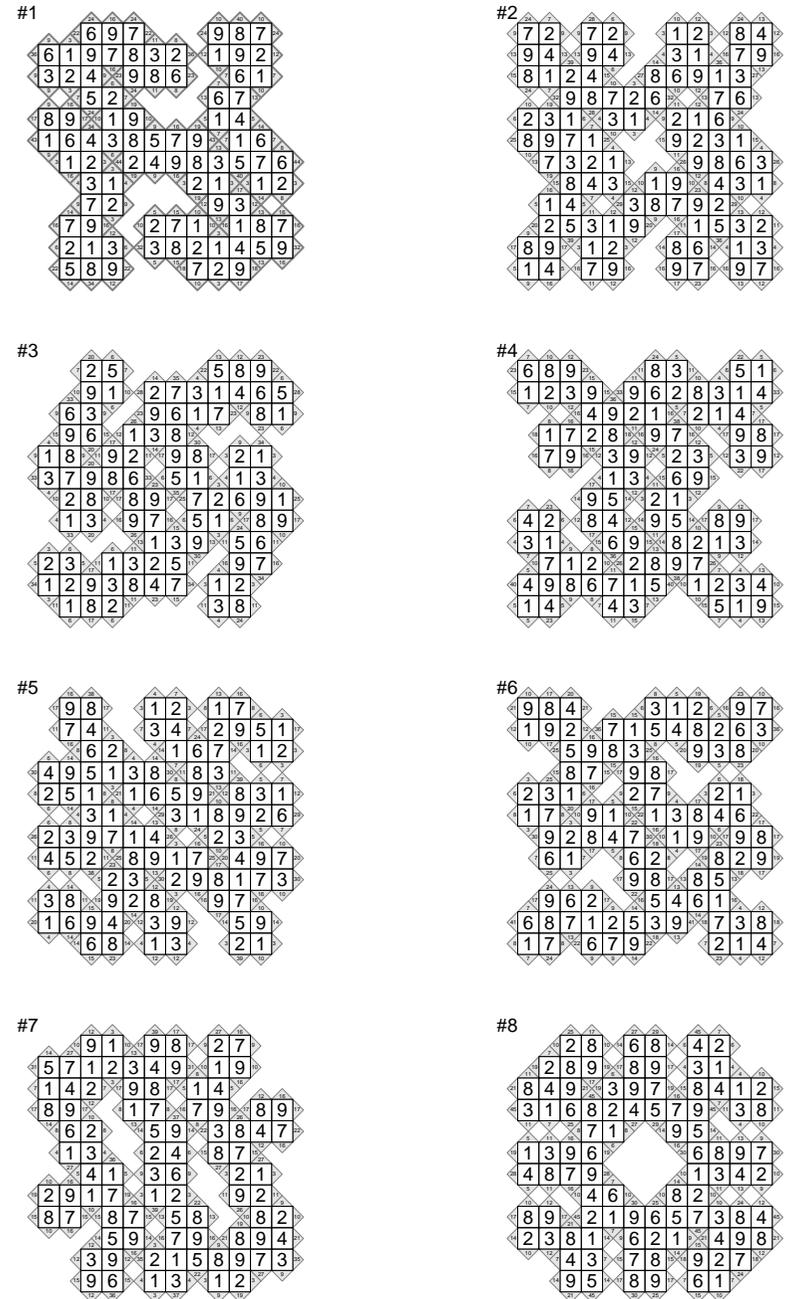

Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

The perversity of the universe tends towards a maximum.

To err may become inhuman.
