Pascal: A programming language named after a man who would turn over in his grave if he knew about it.

Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. Instead of letters, each block contains the digits 1 through 9. The same digit will never repeat within a word. If you add the digits in a word, the sum will be the number shown in the clue. Clues are shown on the left and right sides of "across" words, and on the top and bottom sides of "down" words.

Love at first sight is one of the greatest labor-saving devices the world has ever seen.

Hi there! This is just a note from me, to you, to tell you, the person reading this note, that I can't think up any more famous quotes, jokes, nor bizarre stories, so you may as well go home.
