Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

If one word does not succeed, ten thousand are of no avail.

The way to wealth is as plain as the way to market. It depends chiefly on two words: industry and frugality. It is, we say, neither time nor money, but make the best use of both. Where industry and frugality nothing will do, and with them everything.

-- Benjamin Franklin

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
