Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

The shortest measurable interval of time is the time between the moment I put a little extra aside for a sudden emergency and the arrival of that emergency.

Grrrglort, n.:  
 A person who leaves all his sk passes on his jacket just to impress  
 people.  
 -- Rich Hall, "Sniglets"

Every great improvement has come after repeated failures. Virtually nothing  
 comes out right the first time. Failures, repeated failures, are fingerposts  
 on the road to achievement.  
 -- Charles R. Kettering

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
