Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"We'll love you just the way you are if you're perfect."
 -- Alanis Morissette

The insolent civility of a proud man is, if possible, more shocking than his rudeness could be; because he shows you, by his manner, that he thinks it mere condescension in him; and that his goodness alone bestows upon you what you have no pretense to claim.
-- Chesterfield

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
