Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Anyone nit-picking enough to write a letter of correction to an editor
 doubtless deserves the error that provoked it.
 -- Alvin Toffler

The which is won't, will never wear well, for there is a curse attends it,
 which will waste it; and the same corrupt dispositions which incline men to
 the sinful ways of getting, will incline them to the like sinful ways of
 spending.
 -- Matthew Henry

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
