Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Behold, the fool saith, "Put not all thine eggs in the one basket", which is but a manner of saying, "Scatter your money and your attention", but the wise man saith, "Put all your eggs in the one basket and - WATCH THAT BASKET!"

Receiving a million dollars tax free will make you feel better than being flat broke and having a stomach ache.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
