Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

 Thank you!

Come, let us hasten to a higher plane,
 Where doves tread the fairy fields of Venn,
 Their indices bedecked from one to n,
 Commingled in an endless Markov chain!
 -- Stanislaw Lem, Cyberiad

*Oh don't the days seem lank and long
When all goes right and none goes wrong.
And isn't your life extremely flat
With nothing whatever to grumble at!*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
