Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Never look down to test the ground before taking your next step; only he who keeps his eye fixed on the far horizon will find his right road.  
 -- Dag Hammarskjöld

God will not suffer man to have the knowledge of things to come; for if he had precedence of his prosperity he would be careless; and understanding of his adversity he would be senseless.  
 -- Augustine

Future looks sports: You will spill soap in late evening.

One can never repeat too often, that reason, as it exists in man, is only our intellectual eye, and that, like the eye, to see, it needs light -- to see clearly and far, it needs the light of heaven.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
