*Elmman's Commentary:
1. Things will get worse before they get better.
2. Who said things would get better?!*

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

If you accept the necessity for freedom of expression, it follows that in an intellectual controversy any attempt to coerce rather than to persuade ... is not merely an offense against the person so coerced, but an erosion of the mechanics which make free expression work, and therefore make it possible.
 --Michael Kinsley

40	35	29	36	41	5	7	30	37
31	1	2	17	18	3	8	23	32

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
