Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Others will look to you for stability, so hide when you bite your nails.

All they [fools] actually offer to the public in return for the taxes spent upon them is a form of idle and witless amusement, compared to which a visit to a penitentiary, or even to a State Legislature in session, is informing.
-- H. L. Mencken

It is impossible to make anything foolproof, because fools are so ingenious.

Learned men are the cisterns of knowledge, not the fountainsheads.

Although men flatter themselves with their great actions, they are not so
 often the result of a great design as of chance.
 -- La Rochefoucauld

If you've already donated, thank you so much!
 My family and I really appreciate your support.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
