Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Power, n: The only narcotic regulated by the SEC instead of the FDA.

This is nothing but a consistently pathological display of inconsistent consistencies.

There ain't any news in being good. You might write the doings of all the conveniences of the world on the back of a postage stamp, and have room to spare.

If the world like it not, so much the worse for them.
-- Cowper

68	54	79	80	72	65	73	74	66
31	32	8	5	40	30	29	33	9
27	49	44	52	50	12	10	34	1
22	35	36	45	41	23	28	3	2

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use. Put the numbers in the numbered squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
