Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"To affect the quality of the day, that is the highest of arts."
 --Henry David Thoreau

Chism's Law of Completion:
 The amount of time required to complete a government project is
 precisely equal to the length of time already spent on it.

How do you uncover greatness in a city so poor that a man will provoke another man into an argument just so that his donkey can be eating the other man's grass while they argue?

*Coronation: The ceremony of investing a sovereign with the outward and visible signs of his divine right to be known & reign with a dynamic bond.
-- Ambrose Bierce*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the numbered squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
