If an author write better than his contemporaries, they will term him a plagiarist; if as well, a pretender; but if worse, he may stand some chance of commendation as a genius of some promise, from whom much may be expected by a due attention to their good counsel and advice.
-- Colton

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*Sweet are the uses of adversity, Which like the toad, ugly and venomous,
Wears yet a precious jewel in his head; And thus our life, exempt from public
haunt, Find tongues in trees, books in the running brooks, And good in
everything.
-- Shakespeare*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
