Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

The best way out of a problem is through it.

I don't care how poor and inefficient a country is: they like to run their own business. I know men that would make my wife a better husband than I am; but, damn it, I'm not going to give her to em.
-- Will Rogers

Tis the mind that makes the body rich.
-- Shakespeare

Imagine if every Thursday your shoes exploded if you tied them the usual way. This happens to us all the time with computers, and nobody thinks of complaining.
-- Jeff Raskin, interviewed in Doctor Dobbs' Journal

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
