Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

And though all cry down self, none means his ownself in a literal sense.
-- Butler

The aristocrat is right in that only a few people in any society make a real difference, but the democrat is more deeply right when he insists that we cannot predict where such valuable people are coming from and therefore have an obligation to keep all lines open.
-- Sydney J. Harris

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
