Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Let the soldier be abroad if he will, he can do nothing in this age. There is another person, a person less imposing in the eyes of some, perhaps insignificant. The schoolmaster is abroad, and I must to him, armed with his primer, against the soldier in full military array.
-- Lord Brougham

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
