*Success seems to be that which forms the distinction between confidence and conceit. Nelson, when young was plucked at not being noticed in a certain paragraph of the newspapers, which detailed an action wherein he had assisted. "But never mind," said he, "I will one day have a gazette of my own."*  
-- Colton

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

1	2	60	61	51	13	14	36	31

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
