Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

When there is a very long road upon which there is a one-way bridge placed at random and there are two cars only on that road, it follows that: (1) the two cars are going in opposite directions and (2) they will always meet at the bridge.  
 -- B. D. Firstbrook

"Do you think what we're doing is wrong?"  
 "Of course it's wrong! It's illegal!"  
 "I've never done anything illegal before."  
 "I thought you said you were an accountant!"

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
