Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Want to help me replace my broken pencil sharpener?
 You can make a \$10.00 donation to the
 Or by mail: KrazyDad, P.O. Box 303 San Ysidro, CA 91933 USA
 Thank you!

We use an amalgam of mercury in modern dentistry because other metals, by themselves, are not sufficient to make a filling. But to be worked with at the normal temperatures inside the human mouth, the amalgam must be alloyed with other metals.
 - Mike the Dentist

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the order of the squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
