Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

The Jovian invaders sort a bunch of captives in the nude. These for breadings, those for slaughter, and the fattest ones for food.

To kill an enterprise, criticize the work of the organizers and members. -- Jean-Charles Ferrassier

Any dramatic series the producers want us to take seriously as a representation of contemporary reality cannot be taken seriously as a representation of anything -- except a vision, perhaps, of a world of strings of light in a chair and a few nice similes. -- Richard Schickel

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the numbered squares in order 1-23 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
