Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Of all the agonies of life, that which is most poignant and harrowing -- that which for the most time annihilates reason and leaves our whole organization one lacerated, mangled heart -- is the conviction that we have been deceived where we placed all the trust of love.
-- Bilwari

The person you rejected yesterday could make you happy, if you say yes.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
