Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Speer's 1st Law of Proofreading:  
The visibility of an error is inversely proportional to the  
number of times you have looked at it.

How do you uncover greediness in a city so poor that a man will provoke  
another man into an argument just so that his donkey can be eating the other  
man's grass while they argue?

The person you rejected yesterday could make you happy, if you say yes.

But soft you, the fair Ophelia:  
One may his ponderous and marble jaws,  
But set thee to a minny -- go, go!  
-- Mark "The Bard" Twain

Rune's Rule:  
If you don't care where you are, you ain't lost.

Of all the agonies of life, that which is most poignant and harrowing -- that which for the most time annihilates reason and leaves our whole organization one lacerated, mangled heart -- is the conviction that we have been deceived where we placed all the trust of love.  
-- Bilwari

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
