Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

If you see that there are four possible ways in which a procedure can go wrong, and you circumvent these, then a fifth way, unprepared for, will promptly develop.

Since no matter can be created or destroyed (excluding nuclear and other exotic substances), as one attempts to remove unwanted material (i. e., trash) from one's living space, the remaining material mutates so as to occupy 30 to 50 percent more than its original volume.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
