Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*If you've already donated, thank you so much!  
My family and I really appreciate your support.*

*It's not, it isn't, oh it, and it's it's, not it's, if you mean it,  
is. If you don't, it's its. Then too, it's hers, it isn't her's. It  
isn't our's either. It's ours, and likewise yours and theirs.  
-- Oxford University Press, Edpress News*

People who can't figure out what to do with a Sunday afternoon are often the same ones who can't wait for retirement.

Other people's patterns of expenditure and consumption are irrational and slightly immoral.  
-- Professor Charles P. Iasawi

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
