Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

The youth of today and of those to come after them would assess the work of the revolution in accordance with values of their own ... a thousand years from now, all of them, even Marx, Engels, and Lenin, would possibly appear rather ridiculous.
-- Mao Tse-tung

63	59	51	52	26	17	31	39	34
64	65	40	28	27	10	11	37	33

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
