Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Satisfaction derived from a trip goes down as Expectation goes up if Reality is unchanged. S = R/E as Reality becomes more favorable, the chance for Satisfaction goes up. IF Expectation is unchanged.
 -- Hall T. Sprague

81	71	54	43	38	39	72	73	61

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
