Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

War destroys men, but luxury mangles. At once corrupts the body and the mind.  
 -- Crown

To believe is to be strong. Doubt cramps energy. Belief is power.

I have two very rare photographs: one is a picture of Houdini looking his keys in his car; the other is a rare photograph of Norman Rockwell beating up a child.  
-- Steven Wright

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
