Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

A study of the science of technology defines what is possible; a study of
 the economics of technology establishes which of the possibilities is
 possible.
 —Montgomery Pfister

Space expands to house the people to perform the work that Congress
 creates.
 —Haynes Johnson

67	12	31	14	13	56	68	73	71
57	32	23	58	47	18	33	34	17

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use. Put the numbers in the numbered squares in order 1, 2, 3, etc. until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
