Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"Nature's music is never over; her silences are pauses, not conclusions."  
-- Mary Webb

The Diddle factor changes things so that the equation and the universe appear to fit, within regions that are far from the center. This has the characteristic of ellipsoids and spheres, but opening the subject under discussion to zero importance.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the order of the squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
