Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Don't steal: you'll never thus compete successfully in business.
 -- Ambrose Bierce

I have a feeling that at any time about three million Americans can be had for any militant reaction against you, despite the Constitution, the Supreme Court, Congress, the President, the people.
—John Kenneth Galbraith

My method is to take the utmost trouble to find the right thing to say, and then to say it with the utmost levity.
—George Bernard Shaw

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the order of the squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
