Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

To build something that endures, it is of the greatest importance to have a long tenure in office - no rule for this, years - you can achieve a great success in a year or two, but men's actions have continued their building much longer.
- Antony Jay

If you perceive that there are four possible ways in which a procedure
 can go wrong, and circumstances arise, then a fifth way will promptly
 develop.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the numbered squares in order 1-23 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
