Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"I would never die for my beliefs because I might be wrong."
 -- Bertrand Russell

It is nice to be content in a little house by the side of the road, but a split-level in suburbia is a lot more comfortable.
-- Charles Merrill Smith

There are souls which fall from heaven like flowers, but ere they bloom are crushed under the foul tread of some brutal hoof.
-- Richter

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
