Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Whenever in time, and wherever in the universe, any man speaks or writes in
 any detail about the technical mechanism of a poem, the resulting
 instability of the poem is a constant.
 -- Francis P. Christof

56	80	59	73	74	64	60	75	57
52	76	77	65	34	30	63	78	53

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the numbered squares in order 1-23 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
