Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

The sound of laughter has always seemed to me the most civilized music in the universe.  
-- Peter Ustinov

If on an actuarial basis there is a 50/50 chance that something will go wrong, it actually will go wrong nine times in ten.

And oftentimes, excusing of a fault, Doth make a fault the worse by the  
 excuse: As patches set upon a little breach, Discredit more in hiding of the  
 fault, Than did the fault before it was so patch'd.  
 -- Shakespeare

You can tell it's going to be a rotten day when your twin sister forgot your  
 birthday.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
