Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*If you've already donated, thank you so much!
My family and I really appreciate your support.*

A man has no more right to say an unright thing, than to act one; no more right to say a true thing to another, than to knock him down.
— John Johnson

To understand political power aright ... we must consider what state all men are naturally in, and how far the state of perfect freedom to which men are actions ... which is the state of nature, than to knock him down.
— John Locke

42	39	28	7	6	14	59	58	22
25	18	32	29	4	15	51	52	16
24	17	30	31	5	1	2	20	23

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use. Put the numbers in the numbered squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
