Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Innovations in law, whether good or bad, spin an entangling weave far more often than they sew a straight stitch. Division of labor can make for great efficiency; too great a division of labor in lawmaking can instead create a crazy quilt.
-- Michael Scully

14	15	50	77	78	2	3	62	49

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
