Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"If my films make one more person miserable, I'll feel I have done my job."
 -- Woody Allen

New systems create new problems.
-- Dr. John Galt

Miracles are so called because they excite wonder. In unphilosophical minds, any rare or unexpected thing excites wonder, while in philosophical minds the familiar excites wonder also.
-- George Santayana

*Q: How many Oregonians does it take to screw in a light bulb?
A: Three. One to screw in the lightbulb and two to fend off all those Californians trying to share the experience.*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
