Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

What must be, shall be; and that which is a necessity to him that struggles
 is little more than choice to him that is willing.
 -- Seneca

One man's theology is another man's belly laugh.

As ceremony is the invention of wise men to keep fools at a distance, so good breeding is an expedient to make fools and wise men equal. --- Steele

A phenomenon known to anyone who has ever lit fires: You can throw a burnt match out the window of your car and start a forest fire while you can use two boxes of matches and a whole edition of the Sunday paper without being able to start a fire under the dry logs in your fireplace.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
