Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Experience keeps a dear school, but fools will learn in no other, and scarcely in that, for it is true, we may give advice, but we cannot give conduct. Remember this: They that will not be counseled cannot be helped. If you do not hear reason she will rap you over the knuckles.
-- Benjamin Franklin

"If it weren't for baseball, many kids wouldn't know what a millionaire looked like."
-- Physics Diller

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
