Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*We should be careful to get out of an experience only the wisdom that is in it -- and stop there; lest we be like the cat that sits down on a hot stove-lid. She will never sit down on a hot stove-lid again -- and that is well; but also she will never sit down on a cold one anymore.*  
-- Mark Twain

*The First Commandment of Frisbee: The most powerful force in the world is that of a disc spinning to land under a cup, just beyond reach. This force is technically called "cup suck".*  
-- Dan Roddick

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
