Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Anarchy may not be the best form of government, but it's better than no government at all.

The truly American sentiment recognizes the dignity of labour and the fact that honor lies in honest toil.  
-- Grover Cleveland

Probable-Possible, my black hen,  
She lays eggs in the Relative When,  
She doesn't lay eggs in the Positive Now,  
Because she's unable to postulate how.  
-- Frederick Winsor

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
