Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Tindy ad's d, the coming evil shunt
-- Prior

Terrier's argument that God is His own grandmother generated a surprising amount of controversy among Church leaders, who on the one hand considered the argument unsupported by scripture but on the other hand were unwilling to risk offending God's grandmother.
-- Len Cool, American Pie

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
